Programming e-learning excellent

---

Mr henry definitely helped us a lot in helping us to understand the programming languages better. he encourages us to learn more on html and css especially, as he gave us the freedom to style our websites in the assignments.

---

I hate to say this but i dont understand 90 of what my lecturer is teaching, google has taught me more than this course has

---

Mr henry is clearly very passionate, spending much of his time thinking through about how to make his classes and module seem more interesting for us. he is also responsive to questions asked.
