Qualitative Comments by Students

The class was good but i was abit slow to understand the class

Henry is a very cool lecturer and also very helpful. however, he sometimes teaches the topics a little fast which is a little hard to understand, but he was very fun to learn with other than that.

Does not explain reason for poor marks atall.unreasonable and unfair marking.does not explain lecture and tutorial well.his unfair marking ruined cgpa and passion of a lot of students.
